**GeneSight Pharmacogenomics**  
**Supporting Treatment Decisions**  
**in**  
**LTC & Behavioral Health Settings**

Raymond A. Lorenz, PharmD, BCPP  
Medical Science Liaison, Assurex Health

**Objectives:**

1. Describe pharmacogenomics applications for LTC and behavioral health care.
2. Review key pharmacokinetic and pharmacodynamic principles.
3. Analyze results related to patient care.

---

GeneSight tests are clinically proven to guide prescribing of neuropsychiatric medications. Tests are covered by Medicare B, VA benefits, Medicaid, and many commercial programs.
